

## Features:

- \* CAN interface
- \* USB-C connector
- \* Dual JST CAN connector for daisy chain
- \* Dual Picoblade CAN connector for daisy chain
- \* Standard SLCAN protocol (virtual serial port)
- \* Supports USB flashing through DFU
- \* Can power the CAN bus devices
- \* UART connector for USB - Serial adapter functionality
- \* SWD output to be used as a debugger with Black Magic Probe firmware (software TBD)
- \* Costs < 20 USD in components.

## Revision history:

- 1 - Initial implementation
- 2 - Add a missing trace for one LED
- 3 - USB-C, design for automated assembly, SWD out, replaced CAN transceiver for one provided by PCB assembler

## Microcontroller
